OBJECTIVE

Aspiring frontend developer and IT/networking enthusiast with the goal of using real-world knowledge of web development and IT architecture to produce digital solutions that are scalable, intuitive, and adaptable. passionate about combining functionality and design to enhance user experience, constantly learning new things, and working on worthwhile projects.

WORK EXPERIENCE

- **System/Networking Intern – LIS Nepal (June 2025 – Present):**
Working on a government project involving system network and supporting the Data Center operations of a governmental institute.
- **Frontend Developer Intern- Oxbite Teachologies (Feb-2025 to Apr-2025):**
Creating user-friendly and responsive interfaces is my main goal, along with getting practical frontend programming experience. My objective is to produce aesthetically pleasing, intuitive designs that offer the best possible user experience on a range of screens and devices.
- **Frontend Development Intern – YAJ Tech Pvt. Ltd Company (Aug-2024 to Dec-2024):**
concentrated on creating user-friendly and responsive interfaces while accumulating practical frontend development knowledge.
- **Customer Support Agent – Ambition Guru (Jul-2024 to Aug-2024)**
effectively handled incoming and outgoing calls, offered assistance, and responded to client enquiries.

SKILLS & ABILITIES

- Experienced with DNS, DHCP, EtherChannel, Static Routing, and Cisco Packet Tracer.
- Software development tools include Quasar, Tailwind, HTML, CSS, JavaScript, Vue, Nuxt, React, Quasar, Python, Oracle SQL Developer, GitHub, and Figma.
- Practical experience simulating and configuring networks using Cisco Packet Tracer.
- Excellent interpersonal and communication abilities. Ambition Guru's customer support agent

EDUCATIONAL QUALIFICATION

- Pursuing BSc (Hons) in Computing and Information Technology (4th Semester) at AITM College (Asian Institute of Technology and Management), affiliated with Birmingham City University (BCU).
- Passed out 12th from NEB (National Examinations Board) in 2021-2023

- Passed out 10th from NEB (National Examinations Board) in 2021

PROJECT

- **HelloSarkar:** Using Quasar and vue.js, I helped with the frontend development, making sure the design was mobile-first, responsive, and had easy navigation and optimised functionality to increase platform accessibility and usability. (Link: [Visit Here](#))
- **Sociair:** Using Nuxt.js, I designed and executed important frontend portions that improved the platform's interactivity and produced aesthetically pleasing, performance-optimized designs that complemented the platform's goals. (Link: [Visit Here](#))
- **Oxbite Technologies:** For Oxbite Technologies, a comprehensive, responsive website that ensures a faultless user experience across all platforms was developed and deployed using React and TypeScript. Performance was improved and dynamic content was incorporated for faster load times and higher user engagement. (Link: [Visit Here](#))
- **Swift Advice:** SwiftAdvice websites' frontends were developed and launched using React and TypeScript, ensuring responsive and intuitive user interfaces. emphasises performance optimisation, dynamic content integration, and delivering an enjoyable user experience across devices.
